## EDUCATION

---

**University of New Hampshire - Durham, NH**

**May 2024**

*College of Engineering and Physical Science*

- Bachelor of Science: Information Technology
- Minor in Physics, Geography

## TECHNICAL SKILLS

---

- |   |                                |                             |
|---|--------------------------------|-----------------------------|
| • Typescript/Javascript/Python          | • TCL, Expect, Bash            | • MySQL/SQL                 |
| • VSCode                                | • Agile Workspace              | • JIRA/Bitbucket/Confluence |
| • Proficiency with Git and SVN          | • Analyzing Networks/Wireshark | • HTML/CSS                  |
| • Reading & writing Technical Documents | • Professional Communication   |                             |

## RELATED COURSEWORK

---

- |                                 |                                  |                              |
|---------------------------------|----------------------------------|------------------------------|
| • Integrative Programming       | • Agile Project Management       | • Computer Architecture      |
| • Intro to Software Engineering | • Network/Systems Administration | • Cybersecurity Fundamentals |

## RELATED PROJECTS

---

- Developed and deployed Web Application allowing users to read and write records to a database
- Developing Web Application allowing sanitization, retrieval, and upload of seafloor data to NOAA-managed archive
- Designed TypeScript UI with Database integration
- Developed various web and email scrapers to extract and utilize specific information
- Network Addressing and Basic Troubleshooting and OS Basics courses, earned Cisco Skills For All Badges

## WORK EXPERIENCE

---

**University of New Hampshire Interoperability Laboratory - Durham, NH**

**November 2022 - Present**

*Test Technician*

- Conduct interoperability, conformance and functional testing adhering to ISO/IEC 17025 standards, specifically for the USGv6 and IPv6 Ready logo test programs
- Work with a variety of networked IT products and vendors, including those from Cisco, Juniper, Apple, Dell, HPE, Realtek and more, testing for compliance to RFCs
- Created and worked on scripts for each device functions to help automate testing
- Proficient use of Linux/macOS/Windows CLI to manage and monitor networking behavior
- Communicate with representatives from vendors throughout entire testing time to provide updates on testing status
- Generated over a dozen detailed technical reports following SOP 200, outlining any device failures accompanied with RFC quotes describing compliant behavior at the end of testing
- Guided new hires as IOL Mentor, providing onboarding to matriculation support and valuable advice for success at IOL
- Proficient with Version Control Systems Git and SVN

## COMMUNITY LEADERSHIP

---

- Eagle Scout
