FUTURE

"The internship has been so valuable to me in helping me to learn about not only myself and what I may be interested in but it has helped me to learn about the technology sector."

Grayson Tuttle, Summer '15

## ABOUT IOL HIGHTECH BOUND

In 2006, the UNH-IOL founded a High School Summer Internship program, IOL HighTech Bound, to help fill the pipeline of future engineers. Each year we recruit ambitious students with an interest in computer networking and/or data communications technologies for a paid summer internship at our state-of-the-art laboratory in Durham, NH.

Over the course of 6-weeks, students in our HighTech Bound program work full time in cutting edge technologies and with common industry tools. In addition students will:

- Develop technical skills through hands-on experiences
- Explore career opportunities in technology
- Visit high tech corporations, laboratories and data centers
- Work one-on-one with UNH-IOL engineers
- Foster creative and innovative thinking and processes
- Feel confident in choosing a major for college

## HELP SUPPORT TODAY

Your generous support to our HighTech Bound program will give a high school student an experience that will last a lifetime. Each level of support is designed to provide your company and logo with the best exposure on various signage and marketing materials.

UNH-IOL is a non-profit organization
