Our Program

The University of New Hampshire InterOperability Laboratory (UNH-IOL) is a non-profit test lab which tests networking and data communications products. We provide students the edge to gain real-world training and industry experience.

Our High School Internship Program will give you **hands-on experience** working with UNH-IOL staff developing technologies and products used everyday. Students work with companies all over the world including **fortune 500 companies**, testing their products and services. In addition, student engineers at the UNH-IOL have a 99% career placement into companies after graduation.

Are you interested in taking the first step towards a career in technology? Learn more about this great opportunity with our paid summer internship!

Our Internship Gives You the Chance to...

- Take part in unique, hands-on experience
- Develop real world technical skills
- Enhance your creative and innovative thinking
- Problem solve with new technologies
- On site visits with industry professionals
- Prepare for an education in the technology field
- Be part of a professional and educational culture
- Get paid to learn!

"The internship has been so valuable to me in helping me to learn about not only myself and what I may be interested in but it has helped me to learn about the technology sector."
Grayson Tuttle, Summer ‘15
