

Quality Assurance

Our NVMe Testing Services offer several avenues to help implementers demonstrate the conformance of products to the NVMe specification as well as interoperability in various NVMe environments.

Members gain access to IOL INTERACT software, which streamlines the NVMe Conformance Test Suite. As a member, you have the ability to use IOL INTERACT in your own lab to prepare for conformance testing.

Testing available for:

- NVMe SSDs
- PCIe Host Platforms with NVMe drivers

Integrators List

The UNH-IOL NVMe Integrators List announces conformant and interoperable implementations. The full list is updated frequently and available on our website under [Product Registries/NVMe Integrator's List](#).

Integrators List requirements have been defined by the NVM Express Organization, with a focus on conformance and interoperability testing performed at the UNH-IOL.

Testing and Reports

Due to our unique membership structure, we are able to offer members retesting at no extra charge. Therefore, if a device fails testing during a regularly scheduled testing slot, it can be retested at no additional charge.

Key Benefits

- Increased confidence in your product.
- Save money by reducing time to market.
- Use industry recognized test reports for sales and certifications.
- Access to custom test equipment and software saving you time and money.
- Ability to shape our roadmap to better serve industry needs.
- Ability to test multiple standards against globally recognized products all in one lab.
- Free access to NVMe Plugfests hosted by the UNH-IOL.
- Opportunity to have tested products listed on the NVMe Integrators List.
- Access to IOL INTERACT OC Edition test software for use in your lab.
