

## Serial ATA (SATA)

### Test Solutions for:

- SATA-IO 1.4.3 6 Gigabit Products
- System BER Verification
- SAS Compatibility

### SATA-IO Certified Logo Program

We are an approved SATA-IO Independent Test Lab. Our test reports can be used to submit a product to the SATA-IO Integrators List. Currently, we offer the following SATA-IO Interoperability Program test services for Host and Device products under the Revision 1.4.3 SATA-IO Interoperability Program that includes 6 Gbps products:

- Phy
- Digital
- System Interop
- Mechanical

In addition to SATA-IO testing, we offer conformance and interoperability test services based on the 3.0 SATA spec. These tests go beyond what is required by SATA-IO to further verify product conformance and interoperability.

### Key Benefits

- Increased confidence in your product.
- Save money by reducing time to market.
- Use industry recognized test reports for sales and certifications.
- Access to custom test equipment and software saving you time and money.
- Ability to shape our roadmap to better serve industry needs.
- Ability to test multiple standards against globally recognized products all in one lab.
- Acts as an extension of in-house test labs providing debugging and technical expertise.
