

Overview

We offer a wide range of test suites designed to test both conformance to standards and cross-vendor interoperability for your iSCSI and iSER-related products.

Our iSCSI Testing Services have implemented both an iSCSI Initiator and Target as defined in RFC 7143. This gives us a unique perspective as an organization that not only performs standards-based testing on iSCSI products, but also gains insight into your perspective as an implementer of the standard.

Test Solutions:

- iSCSI Targets
 - iSCSI Storage Arrays
 - Software iSCSI Targets
- iSCSI Initiators
 - Adapters (HBA, RNIC, TOE)
 - Software iSCSI Initiators

Conformance and Interoperability Services

- Login Phase Conformance
- Full Feature Phase Conformance
- CHAP Conformance
- Multi-connection Conformance
- Error Recovery Conformance
- iSCSI Interoperability Testing
- iSNS Interoperability Testing
- iSER Target Conformance

Key Benefits

- Increased confidence in your product.
- Save money by reducing time to market.
- Use industry recognized test reports for sales and certifications.
- Access to custom test equipment and software saving you time and money.
- Ability to shape our roadmap to better serve industry needs.
- Ability to test multiple standards against globally recognized products all in one lab.
- Take advantage of our two-day training seminar for entry-level iSCSI implementers, including both members and non-members (at an additional cost).
