

Software Defined Networking

We are focused on offering testing services that reduce the time to market for our customers, and accelerate the interoperability of SDN protocols. Our team has experience with OpenDaylight, ONOS and RYU controllers.

Test Solutions for:

- Switches
- SDN Controllers
- SDN Applications

Extensive Test Beds & Interoperability

We have a large multi-vendor switch inventory to validate use cases and solutions to ensure interoperability. Our highly skilled and trained staff will work directly with you to develop customized test cases that are relevant to meet your goals.

Benchmarking

Partnering with test equipment manufacturers we can offer the Openflow® SDN Controller benchmarking framework. We also provide a third party neutral benchmarking testing for consistent measurement that will be trusted by industry.

Key Benefits

- Increased confidence in your product.
- Save money by reducing time to market.
- Use industry recognized test reports for sales and certifications.
- Access to custom test equipment and software saving you time and money.
- Ability to shape our roadmap to better serve industry needs.
- Ability to test multiple standards against globally recognized products all in one lab.
- Acts as an extension of in-house test labs providing debugging and technical expertise.
