The following table highlights the mandatory tests required for the OpenFabrics Interoperability Logo for the InfiniBand-to-FibreChannel Gateway device class per the Test Plan and the current OpenFabrics Interoperability Logo Program (OFILP).

Additional beta testing than reflected in this report was performed using the DUT. A separate report will outline those results.

Test Procedures	IWG Test Status	Result/Notes
<u>11.1: Link Initialization</u>	Mandatory	PASS
<u>11.2: Fabric Initialization</u>	Mandatory	PASS
<u>11.5: SM Failover and Handover</u>	Mandatory	PASS
<u>11.7: IB Ethernet Gateway</u>	Beta	Not Tested
<u>11.8 IB FibreChannel Gateway</u>	Beta	Not Tested

Summary of all results follows on the second page of this report.

For Specific details regarding issues, please see the corresponding test result.

Result Key

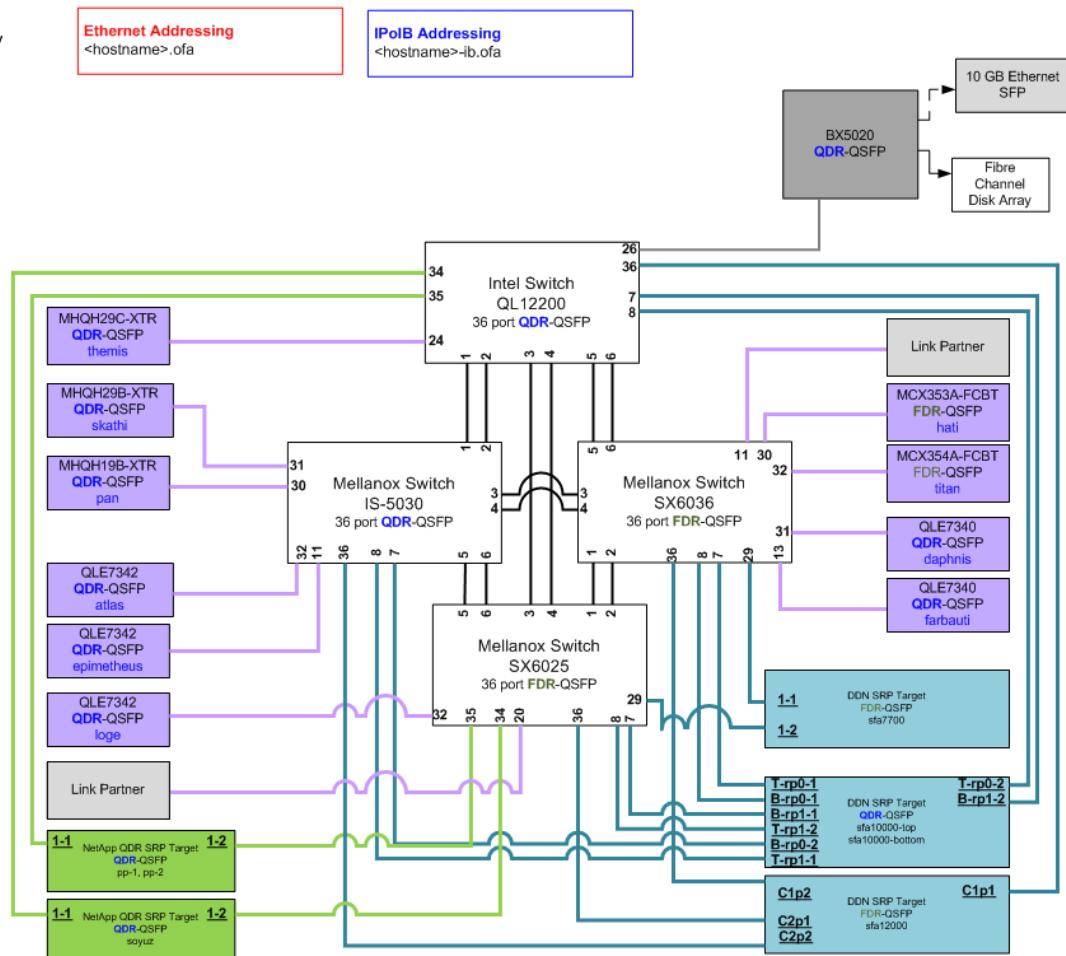

The following table contains possible results and their meanings:

Result:	Description:
PASS	The Device Under Test (DUT) was observed to exhibit conformant behavior.
PASS with Comments	The DUT was observed to exhibit conformant behavior however an additional explanation of the situation is included.
Qualified PASS	The DUT was observed to exhibit conformant behavior, with the exception of fault(s) or defect(s) which were previously known.
FAIL	The DUT was observed to exhibit non-conformant behavior.
Warning	The DUT was observed to exhibit behavior that is not recommended.
Informative	Results are for informative purposes only and are not judged on a pass or fail basis.
Refer to Comments	From the observations, a valid pass or fail could not be determined. An additional explanation of the situation is included.
Not Applicable	The DUT does not support the technology required to perform this test.
Not Available	Due to testing station limitations or time limitations, the tests could not be performed.
Borderline	The observed values of the specific parameters are valid at one extreme and invalid at the other.
Not Tested	Not tested due to the time constraints of the test period.
